Introduction

Thank you for your enquiry for Countrywide Grounds Maintenance, Dorset region, to provide you with a one-off works proposal.

We hope that the details below accurately interpret your requirements. Should they differ in any way to what you require then please advise what changes you need to make and a revised proposal will be drafted and returned to you.

Proposal Findings

Item No.	1298
Subject:	Vertidrainning plus selective with feed
Survey findings:	Following recent site visit and discussion ...
Remedial works required:	To help get with the drainage of the field and to reduce the weeds – • Vertidrainning with a good heave • Total area just over 2 hectares • Cost includes transport of specialised machinery for the works • Selective herbicide treatment of the field • Liquid feed applied to help with the grass growing in where the weeds have taken over Notes: The rootzone is really compacted so a deep vertidrain should help to resolve this. The best time to undertake will be early September to reap the benefits for the winter due to the current spell of dry weather without rainfall. The weeds are starting to creep in so treatment now is recommended to save an infestation and then a costly weed kill and overseed with top dressing in a year or two.

Potential H&S risk rating if issue left unresolved:	HIGH	MEDIUM	LOW
		✓	
Cost to carry out all remedial works	£2,515.00
